KING SAUD UNIVERSITY
COLLEGE OF COMPUTER AND INFORMATION SCIENCES
DEPARTMENT OF SOFTWARE ENGINEERING

Course Code / Title: SWE-381/ Web Applications Development

Professor: Dr. Saleh Alghamdi

Semester / Year: Semester II/2025

Date: February, 2025

Project Description

The project aims to implement a https://stackoverflow.com-like web application. The minimum features to develop are:

- Register/Login/Logout

- Add/Edit a question (requires login)

- View my previous questions (requires login)

- Add/Edit an answer (requires login)

- View my previous answers (requires login)

- Add/Edit a comment on a question or an answer (requires login)

- Rate an answer (requires a login)

- Search a question and display results

Instructions on how to submit your project

Each student of the same group should submit a copy of his group project on LMS (no project would be accepted by email):

1. A project's report.
   - Please provide a title page with all the necessary information (including the names and student numbers).

2. A folder which contains the source files.

What to write in the report

a) Organization of the packages. (Must be clear (images, HTML or PHP files, JavaScript, CSS, database, etc.) each must be in a separate folder.
b) How did you divide the labor?
c) The content of the Zip file (a list of filenames and their purpose).
d) Screenshots of the main functionalities.

Demo

Later, we will post the dates for each group to do a demo.
